

## Basic flow

- User writes a message.
- User adds a question mark reaction to their message.
- Bot writes response to that message (it uses previous messages as context)

## Default

- J1-Grande-V2 with default parameters hooked up to discord bot.
- Chat history is remembered with the user.
- There will be 1 text generation call per user message.
- Discord bot hosting is less than \$5/month.
- Estimated developer hours for **default** is 30 hours.
- Contingency of extra 10 hours is provided for unexpected issues.

## Extra Features (Built on top of default)

Features	Implementation	Result	Pricing	Developer Hours
Variable Preset	Model decides which preset/model to use (e.g., QA, copywrite, logical reasoning).	General answers will be more accurate.	+1 text generation call per user message	30 - 40 hours
Indexed AI21 Information	Requires Variable Preset feature.  AI21 information is indexed.	Answers about information related to AI21 will be more accurate	+1 embedding call if question is related to AI21 per user message	10 – 20 hours
Google Serper	Includes access to Google Search results before creating response	Information about recent events.	\$0/month = 100 searches/month  \$50/month = 5,000 searches/month  \$130/month = 15,000 searches/month	10 – 20 hours

## Developer's note

Hi all,

My rate is \$30/hour. Let me know if you are interested in the extra features or if there are others that you would like to include. Open to discussing this more.

Cheers,

Rahel
